

## **Wood Plastic Composite decking(WPC decking)**

### **cleaning & maintenance recommendations**

#### **Rust**

- Mostly with water(or add some soap) under sponge scrubbing is enough.
- For stubborn rust, add a little citric acid into the water
- After that, rinse the decking with clean water

#### **Oil**

- Use some degreasing solvents or soapy water to remove the oil on the surface quickly
- If can't be cleaned, use sandpaper sanding along the decking to remove deep grease
- After that, rinse the decking with clean water

#### **Grape juice / fruit stains**

- Use some cleaner and water to clean the decking
- For stubborn stain, change into warm water and bleaching agent
- After that, rinse the decking with clean water

#### **Stain / scratch**

- Use sandpaper sanding along the decking to remove the stain/scratch

#### **suggestion**

- Most of the time, sweep or scrub the decking surface or rinse by high-pressure water is enough.
- Need to take protection to avoid oil grease when BBQ on the WPC decking.
- We do not suggest that set a fire of stove on the WPC decking
